PROFESSIONAL SUMMARY

Strategic Product Leader with 20 years of experience driving product strategy, P&L ownership, and platform modernization across Healthcare, Financial Services, and Sustainability. At Oracle, owned a \$125M+ revenue portfolio and led cloud migration for 800+ enterprise customers. At Microsoft, built and scaled Azure AI services from inception to 1,000+ customers and led AI product strategy across three Industry Clouds. Known for turning ambiguous, high-stakes initiatives into structured execution plans, mentoring cross-functional teams, and translating technical complexity into business outcomes.

CORE COMPETENCIES

Strategic Business Leadership: P&L Management (\$125M+), Product Strategy & Portfolio Management, Go-To-Market Strategy, Value-Based Pricing & SKU Optimization

AI & Clinical Intelligence: Generative AI Strategy (Foundation Models, SFT), Clinical NLP (NER, Relation Extraction), John Snow Labs (JSL) Medical NLP

Platform Modernization: Decentralized API Design, SMART on FHIR, OAuth 2.0, Multi-Cloud Architecture (OCI & Azure)

Operational Excellence: Time-to-Value Optimization, Enterprise-Scale Cloud Migration, Deployment Automation

EXPERIENCE

Oracle Corporation

Senior Principal Product Manager/Director, Health Data Intelligence (HDI) June 2023 – Present

Owned product strategy and P&L for the ~\$125M HDI Analytics and Health Data Warehouse (HDW) portfolio — the AI and analytics platform powering clinical decision-making for 800+ healthcare organizations. Led a team of 4–5 PMs across the Analytics and HDW product areas. Drove strategic initiatives across clinical NLP, Time-to-Value (TTV) platform automation, and API modernization.

- **Clinical Data Intelligence (AI/NLP):** Defined the strategy to unlock 9B+ unstructured clinical notes for pharma trial recruitment — enabling patient cohort identification in hours instead of months and expanding HDI's addressable market into the higher-margin life sciences vertical. Redirected from a \$30M LLM pipeline (GPT, F1 ~70%) to John Snow Labs Medical NLP (F1 >90%), achieving 93% OpEx reduction (~\$2M vs. \$30M) with a flat-fee license model. Architected the "80/20" tiered strategy: JSL encoders for standard entities, LLM reasoning for complex use cases.
- **Platform Efficiency (Time-to-Value):** Led the initiative to reduce HDI customer onboarding from 6+ months to under 1 month by defining "Standard HDI" deployment defaults, decoupling data ingestion from customization, and creating a cross-functional Gantt chart spanning 15+ teams. Reduced per-customer onboarding cost from ~\$80K to ~\$5K, unlocking scalable access to down-market segments worth ~\$1.2B in addressable opportunity.
- **Cloud Migration Strategy:** Authored and executed the AWS-to-OCI migration strategy for 800+ customers. Conducted roadshows with enterprise health systems and delivered the first customer migration from AWS to OCI. Reduced Oracle Analytics Cloud (OAC) report conversion costs from \$100M+ to \$12M by restructuring the consulting engagement model.
- **API Platform Modernization:** Led the shift from monolithic APIs to a decentralized platform on Oracle Health API Platform (OHAP) Gateway with OAuth 2.0 / SMART on FHIR. Designed developer onboarding and partner enablement strategy for GSIs/ISVs. Identified a critical security gap in system account management, driving prioritized remediation with Cloud IAM.
- **GTM & Pricing:** Redesigned the HDW pricing model with usage-based tiers, discontinued Snowflake under Enterprise Data Warehouse (EDW)-Advanced SKUs to align with OCI strategy and led SKU-to-content mapping for the Ambulatory Business Suite launch.
- **Team Leadership & Customer Advocacy:** Led a team of 5+ PMs across experience levels, setting standards for PRD quality and customer engagement. Led the first Weekly Business Review (WBR) and PR-FAQ for HDW. Resolved high-severity escalations across enterprise accounts, including protecting an \$8M deal at risk. Established best-practice escalation guidelines across product engineering, field, and consulting.

Microsoft Corporation Redmond, WA

Principal PM Manager, Azure AI & Industry Clouds (Finance, Sustainability, Energy) Mar 2020 – Apr 2023

- Directed end-to-end AI product strategy across three Azure Industry Clouds, leading cross-functional teams of PMs and Data Scientists. Developed LLM-driven solutions (T5, GPT-3) for SEC filing summarization, ESG entity extraction, methane leak detection, and automated invoice processing. Achieved 20% increase in enterprise customer adoption within 6 months and drove \$200M+ in Azure contract renewals with multinational banks.
- Built the customer onboarding strategy that led to adoption by 30+ enterprise customers including 2 global banks. Established partnership agreements with 3 key ISVs and validated the product roadmap through market analysis. Hired domain experts in quant finance and energy to build deep learning proxy models for capital markets risk analysis and options pricing.

Senior PM Manager, Azure AI Ecosystem Jan 2016 – Mar 2020

- Spearheaded ISV ecosystem strategy and managed a team of PMs shipping high-profile open-source AI repositories ([NLP](#) 6K+ stars, [Computer Vision](#) 9K+ stars, [Recommenders](#) 21K+ stars). These repos became reference implementations that drove Azure AI platform adoption across the developer community.
- Led critical AI workload migrations for enterprise customers, generating \$100M+ in incremental Azure revenue across Fortune 500 companies.

Product Manager, Azure Stream Analytics & StreamInsight Jan 2012 – Jan 2016

- Launched Azure Stream Analytics V1 from inception to GA in 12 months with a GTM plan for TechEd Europe and a partner event attended by 60+ partners. Grew to 1,000+ customers within the first year (12% MoM growth) while maintaining 99.9% uptime for production workloads including Xbox Halo. Owned query language, IoT ingestion, ML integration, and geo-spatial features.

Senior Engineer, SQL Server & Business Intelligence Aug 2005 – Jan 2012

- Served as the senior escalation point for premium Microsoft customers in the SQL Server and BI ecosystem. Owned product pipeline for SQL Integration Services and Reporting Services. Built deep technical and customer expertise across SQL Server, StreamInsight CEP engine, and BI platforms — foundational knowledge that informed the transition to product management.

EARLIER CAREER

Micro Architect | Co-Founder — Bangalore, India.

Co-founded a B2B SaaS startup for the tours and transport industry. Managed end-to-end product lifecycle from capital allocation to market launch of “Smart Traveler,” a real-time logistics platform.

EDUCATION & CERTIFICATIONS

Master of Computer Applications (MCA) — Bangalore University, India

Bachelor of Computer Science (BS) — Bangalore University, India

Advanced AI Projects Portfolio — Microsoft AI School

PATENT, AWARDS & SPEAKING

Patent: Constructed Data Stream for Enhanced Data Processing (US Patent No. 9870410, Jan 2018)

Speaking: Microsoft Build, Strata, Hannover Messe, Oracle Cloud World, PASS Summit

Awards: Golden Volcano (The Garage), ACE Star Performer

Work Authorization: US Lawful Permanent Resident
